**TO WHOM IT CONCERNS**

I have had the good fortune of knowing Trevor Jull for the last 18 years. During that period I owned and managed several building firms and Trevor was working for me as a private contractor builder on many of the building projects that my companies were involved with.

He has a wide range of expertise in the building industry and while contracting to us built many different styles of houses.

The most recent house that he built for me is a 650m<sup>2</sup> house situated on the cliff top at Gulf Harbour. A magnificent property that has a valuation of approx \$3 million

Trevor has all the skills required as a top Builder, a pleasant and easygoing personality and I would recommend him to any prospective client.

Please contact me should you need any further clarification

Yours Faithfully,
