To whom it may concern.

I would like to personally recommend Trevor Jull of 3D builders to any prospective customers.

During 2011/2012 Trevor worked closely with me during the build at the address above to ensure that I got what I actually wanted, and to ensure that all work was to schedule and to the required standard.

During the build process Trevor used his extensive experience to offer many helpful suggestions and ideas to either optimise / improve the build, and/or save costs.

He and his team were always busy, friendly and accessible, with no question unanswered, and the workmanship was excellent.

The build was on time, and to agreed budget.

I have no hesitation in acting as a reference for Trevor / 3D builders.
