

9 July 2014

I could not recommend 3 Dimensional Builders more highly.

We have a stunning new house that was built on time, within budget and with none of the normal building hassles you hear about.

Our brief was for an affordable eco-friendly house that would blend seamlessly into our beautiful site overlooking the Mahurangi Harbour. We got this and so much more in terms of the finished quality, look and feel of the house - we have pretty high standards and I'd done a lot of research beforehand.

Trevor did a great job of assisting me through all the tricky decisions so that money was spent on things that would matter in the long run. When I look back now there is not a single thing I would change about the house.

Trevor is an unusual combination of being a perfectionist yet very easy to work with. The end result is a very good looking, exceptionally well constructed house that will last forever. If you are looking for high quality, value for money and someone you can trust (think good old fashioned integrity) you can't go past Trevor and his team. In our district, local tradespeople use Trevor to build their own homes.
